Campus Connect Website

A simple interactive website using HTML, CSS, and JavaScript

Project Description

Campus Connect is a responsive campus events website where students can explore workshops, cultural programs, and community activities. It includes interactive event buttons, a mobile navigation menu, and a demo email sign-up confirmation.

Features

- Responsive design for desktop and mobile
- Navigation menu with a mobile toggle
- Event cards with interactive detail messages
- Email form with a demo confirmation message
- Modern styling, hover effects, and smooth scrolling
- Uses plain HTML, CSS, and JavaScript without external libraries

How to Run

1. Create a folder named **campus-connect**.
2. Save the code sections as **index.html**, **style.css**, and **script.js**.
3. Keep all three files in the same folder.
4. Open **index.html** in a web browser.

Note: The email sign-up is a front-end demo and does not send or store emails.
